Introduction

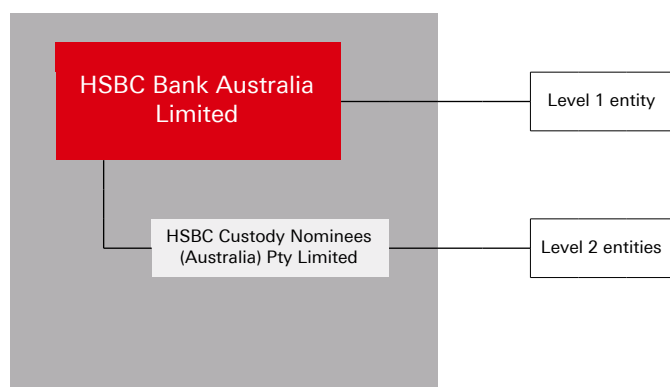

Purpose

This report has been prepared by HSBC Bank Australia Limited to meet its disclosure requirements under the Australian Prudential Regulation Authority's ('APRA') Prudential Standard APS 330: Public Disclosure. Figures contained within this report relate to quarter ended 30 Jun 2020 (unless otherwise stated).

Scope of application

For regulatory ('APRA') reporting purposes, HSBC Bank Australia Limited ('HBAU') establishes two levels of reporting; Level 1, which is HSBC Bank Australia Limited only, and Level 2, which is the consolidation of HSBC Bank Australia Limited and all its financial subsidiaries.

The Pillar 3 disclosures are based on Level 2 – Consolidated basis.

Verification

The Pillar 3 disclosures are not required to be audited by an external auditor. However, the disclosures have been appropriately verified internally and are consistent with information that is lodged or published elsewhere or that has been already supplied to APRA.

HSBC Bank Australia Limited context

HSBC is one of the world's largest banking and financial services organisations and therefore deals with multiple regulators in multiple jurisdictions around the world. HSBC Holdings plc, regulated by the Prudential Regulation Authority ('PRA') in the UK, operates under the Advanced Internal Ratings Based Approach ('IRB-A') for the majority of its Credit Risk, the Standardised Approach for Operational Risk and a mix of the Internal Models Approach and the Standardised Approach for Market Risk (since 1 January 2008).

The Hongkong and Shanghai Banking Corporation Limited regulated by the Hong Kong Monetary Authority ('HKMA') in Hong Kong, has adopted the IRB-A approach for Credit Risk, the Standardised approach for Operational Risk and both the Internal Models and Standardised approach for Market Risk as of 1 January 2009.

HBAU has adopted the APRA Standardised approach for Credit, Market and Operational Risks as of 1 January 2008.

Regulator	Institution	Credit risk	Operational risk	Market risk
APRA	HBAU	STD	STD (ASA)	STD
HKMA	HBAP	IRB-A	STD	IMA/STD
PRA	HSBC Holdings plc	IRB-A	STD	IMA/STD

IRB-A	=	Internal Ratings Based – Advanced Approach for Credit Risk
IMA	=	Internal Models Approach for Market Risk
STD	=	Standardised Approach for either Credit, Market or Operational Risk
STD (ASA)	=	Standardised Approach (Alternative Standardised Approach) for Operational Risk

Frequency

This report, comprising Capital Adequacy disclosures (Table 3), Credit Risk (Table 4), Securitisation Exposures (Table 5) and Liquidity Coverage Ratio Disclosure (Table 20) is released on a quarterly basis.

The Regulatory Capital Composition and Reconciliation (Table 1), Net Stable Funding Ratio (Table 21) and Remuneration disclosures (Table 18) are published annually as at 31 December balance sheet date and can be viewed on the HSBC website under the 'Financial disclosures' tab using the following link:

<https://www.about.hsbc.com.au/hsbc-in-australia>

The Bank's main features of capital instruments (Table 2) are updated on an ongoing basis and are available at the Regulatory Disclosures section of the Bank's website at the above address.

Capital

Table 3: Capital adequacy (consolidated)

	At	
	30 Jun 2020 \$m	31 Mar 2020 \$m
Capital requirements (in terms of risk-weighted assets) for credit risk by portfolio		
Corporate	4,607.5	5,145.7
Government	—	—
Bank	573.6	592.6
Residential mortgage	10,256.5	10,017.5
Other retail	712.5	833.8
All other	360.2	309.2
Total Credit risk weighted assets (excluding securitisation)	16,510.3	16,898.8
Capital requirements (in terms of risk weighted assets) for securitisation	25.3	—
Capital requirements (in terms of risk-weighted assets) for market risk	38.6	109.5
Capital requirements (in terms of risk-weighted assets) for operational risk	2,630.0	2,442.9
Total risk-weighted assets	19,204.2	19,451.2
Capital ratios (for the consolidated banking group)		
Common equity tier 1 capital ratio	11.0%	10.6%
Tier 1 capital ratio	12.3%	11.8%
Total capital ratio	13.9%	13.5%

General reserve for credit losses ('GRCL')

The GRCL represents a reserve created against the possibility of future credit losses (currently unidentified) prudently estimated but not certain to arise over the full life of all the individual facilities making up the business of HBAU.

For regulatory capital purposes, the difference between the GRCL and any accounting provisions deemed not to be regulatory specific provisions (the GRCL Shortfall) (net of tax) is deducted from Common Equity Tier 1 capital.

The General Reserve for Credit Losses is included in Tier 2 Capital.

Liquidity Coverage Ratio Disclosure

The Liquidity Coverage Ratio (LCR) aims to ensure that a bank has sufficient High Quality Liquid Assets (HQLA) to meet its liquidity needs in a 30 calendar day severe liquidity stress scenario. HBAU follows guidelines set by APRA and is compliant with the minimum coverage ratio requirement of 100%. HBAU reported a weighted average LCR of 172.1% in the quarter ended 30 June 2020.

HBAU maintains a well-diversified and high quality liquid asset portfolio to support regulatory and internal requirements. Average liquid assets for the quarter were \$15.3bn, of which HQLA was \$11.0bn. HBAU's mix of liquid assets consists of HQLA, being cash, deposits with Central Bank, Australian Semi Government and Commonwealth Government Securities. Liquid assets also include repo-eligible securities with the Reserve Bank of Australia under the Committed Liquidity Facility (CLF).

Funding sources to support business growth are primarily from customer deposits.

LCR NCOs represent the net cash flows that could potentially occur from on and off balance sheet activities within a 30-day severe liquidity stress scenario. The cash flows are calculated by applying APRA prescribed run-off factors to maturing debt and

deposits offset by inflows of assets based on prescribed run-off factors. Higher run-off factors are applied to sophisticated investors and depositors including long term and short term debt holders, financial institution and corporate depositors. Lower run-off factors are applied to deposits less likely to be withdrawn in a period of severe stress. These include deposits from people and from small and medium enterprises. Deposits from corporate and financial institutions, which are considered to be operational in nature, also attract a lower run-off.

Cash outflows arising from business activities that create contingent funding and collateral requirements, such as repo funding and derivatives and the extension of credit and liquidity facilities to customers, are also captured within the LCR calculation along with an allowance for debt buyback requests.

HBAU manages its LCR position on a daily basis, ensuring a buffer is maintained over the minimum regulatory requirement and the Board's risk appetite.

During the period of March 2020 to June 2020, the average LCR ratio has increased by 6.1% from 166.0% to 172.1%. This was mainly attributable to increased liquid assets of \$2.3bn comprised of high quality liquid assets of \$1.9bn and alternative liquid assets of \$0.4bn; partially offset by increased net cash outflows of \$1.0bn driven by increased outflows from unsecured wholesale funding of \$1.0bn.

Table 20: Liquidity Coverage Ratio Disclosure

	At 30 Jun 2020		At 31 Mar 2020	
	Total unweighted value (average) \$m	Total weighted value (average) \$m	Total unweighted value (average) \$m	Total weighted value (average) \$m
Liquid assets		15,279.1		12,997.0
